

Effortlessly cool your home using the sun's energy with the convenience of solar attic fans.

Experience Cooling Comfort and Savings with Solar Attic Fans!

- Solar attic fans reduce the workload on the AC system, easing its burden.
- Improved comfort inside the house due to better ventilation and heat reduction.
- Cost savings on electricity bills through decreased AC usage.
- Enhanced efficiency of AC units located in the attic, as they no longer overheat due to inadequate ventilation.
- Effective solution for attics with limited or no ventilation.

Unlock Energy Savings with Solar Attic Fans

Beat the Heat

Garage Exhaust Vent Kit

The Garage Exhaust Vent Kit is designed to effortlessly convert the 20W and 30W fan into a practical garage exhaust vent, effectively cooling the space by eliminating both hot air and harmful fumes.

Keep Your Home Cool and Energy Efficient with Solar Attic Fans

Harness The Power of the Sun and Keep Your Attic Cool With Solar Attic Fans

Solar attic fans also contribute to the longevity of your roof by minimizing the risk of moisture-related issues, such as mold or rot.

Their installation is hassle-free, and once they're up and running, they require minimal maintenance. With their eco-friendly operation, cost savings, and protective qualities, solar attic fans are truly a win-win solution for any homeowner.

Solar attic fans are a smart choice for homeowners seeking to improve their indoor comfort and energy efficiency.

- 100% solar powered ventilation system for attic and garage.
- Qualifies for Federal Tax Credits.
- Extends life of roof by preventing damage from stagnant hot air and moisture accumulation.
- Lowers electricity costs by reducing A/C load and makes living spaces noticeably cooler.
- Safeguards your home and health by preventing growth of toxic mold and mildew.
- Extends life of insulation and makes it more effective at reducing heat transfer into your home.

Solar attic fans operate without consuming electricity or adding to your utility bills

Solar attic fans are ideal for:

- Attics
- Garages
- Sheds
- Dog houses
- Storage units
- Barns
- Warehouses
- And more

Our solar attic fans are backed by our Limited 10-Year Warranty, ensuring long-lasting performance and customer satisfaction.

- Adjustable solar panels withstand high winds, hail, and snow loads.
- Rustproof, strong, and durable 1100-O aluminum components ensure longevity.
- A unique, one-piece seamless flashing provides additional protection against leaks.
- Thoroughly engineered louver ring maximizes airflow and provides a bug-proof seal.
- Quiet and inaudible ventilation achieved by a 5-wing, 14" precision-balanced fan blade.
- Hurricane tested and approved for added peace of mind.
- Durable and high-performance DC motor, comes standard with thermostat.
